9. ☐ Other _____.

EXAMINER'S STATEMENT FOR REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Examiner wrote prior actions based upon the interpretation of a fiber coating with multiple layers having glass transition temperatures as claimed. Later clarification via a telephonic interview clarified that this fiber coating was that of a single copolymer coating and therefore the prior art made of record fails to explicitly disclose or reasonably suggest a curable optical fiber coating that comprises a block copolymer with a primary hard block and secondary soft block. This block polymer consists of a high polymer whose molecules are made up of alternating sections of one chemical composition separated by sections of a different chemical nature or by a coupling group of low molecular weight. Said copolymer structure has a single layer material with different segments as opposed to the prior art, which has individual, separate layers of varying material.
2. Applicant's submitted IDS includes reference to prior art United States Patent Number 5,250,390 to Gries for a light curable elastomeric copolymer, however, the apparatus of Gries deals with the production of elastic relief printing plates and not an optical fiber coating. Therefore claims 1, 20 and 34 are allowed. Claims 2-3, 6-10, 12-19, 21-26, 29, 31-33, 35, 37-39 and 42-48 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
